Professional Summary

Software Engineering undergraduate with hands-on experience in Full-Stack Development and ERP Systems. I am enthusiastic about using technology to tackle real-world challenges. My strong foundation in software engineering principles is complemented by my skills in web and mobile app development. I thrive in dynamic learning environments and am passionate about continuous improvement and contributing effectively to innovative projects.

Technical Skills

- Programming Languages: Java, C++, C#, PHP, JavaScript, SQL, HTML, CSS, Kotlin
- Web Frameworks & Libraries: Spring Boot, React.js, Next.js, Node.js, Express.js, React Native
- Databases & Data Management: MongoDB, PostgreSQL, MySQL, Firebase
- Tools & Version Control: Docker, Git/GitHub, Blockchain
- Specialized Domains: Full-Stack Web Development, Mobile Application Development, AI Integration

Work Experience

May 2025 - Nov 2025

Residue Solutions (Pvt) Ltd | Software Developer Intern

- Designed and deployed mission-critical modules for a Cloud ERP Platform tailored for SMEs, streamlining operations such as inventory, supplier management, payments, and customer relationships using Next.js and Spring Boot.
- Engineered robust backend architectures with Spring Boot and MySQL, implementing secure role-based access control for multi-level employee access.
- Contributed to the development of the Quality Control Dashboard (Project QCD), utilizing AI and image recognition to automate defect detection and enhance product quality during manufacturing.
- Managed database infrastructure using MongoDB Atlas and collaborated cross-functionally via GitHub and Jira.

Project Experience

Automated Sri Lanka's Rating Valuation System - GIS, Computer Vision, Blockchain

- Developed a final-year research project to automate property valuation in Sri Lanka using GIS and computer vision for object detection.
- Implemented Solidity smart contracts for tax calculation and data integrity.
- Analyzed satellite imagery and street view photographs via neural networks such as Convolutional Neural Networks (CNN) to categorize buildings and land features.

My Care - Smart Healthcare Application - Spring Boot, React.js, PostgreSQL

- Collaborated with a team to develop a healthcare web application enabling users to make appointments, view schedules, and connect with pharmacies.
- Implemented advanced security protocols and data management features to ensure smooth functionality and a safe user experience.

AQuaguard - React Native Expo, Firebase

- Designed a community-based water source mapping and quality reporting mobile application to help users find water sources and their status.
- Integrated Google Maps iOS SDKs to enhance mapping functionalities..

Virtual Dressing Room - React.js, Tailwind CSS

- Developed a virtual dressing room application to help users select, match, and view clothes catering to different presets.

Quality Control Dashboard - MERN Stack, AI

- Built a dashboard to track defects, handle inspections, and view real-time quality metrics using image recognition technology for automatic defect detection.
- Implemented analytics for defect tracking and real-time alerts about quality issues.

Cloud ERP Platform - Next.js, Spring Boot, MySQL

- Developed an online business management tool offering a complete solution for SMEs to run operations like employee roles, inventory, suppliers, payments, and customer relationships.
- Implemented role-based access control and brought all important functions into one cloud system.

EV Charging Station Management System - C# .NET, MongoDB, React.js, React Native

- Developed a scalable C# .NET Web API backend integrated with MongoDB to manage users, charging stations, and booking data efficiently.
- Designed a React.js web frontend with Tailwind CSS for back-office administration, featuring dashboards for station operators, schedule management, and EV owner tracking.

Education

Sri Lanka Institute of Information Technology (SLIIT) 2022 - Present (Expected 2026 Sep)

BSc (Hons) in Information Technology, Specializing in Software Engineering (Undergraduate)

R/Sivali Central Collage 2012/2021

G.C.E Advanced Level - Maths Stream
